Dear Sir / Madam

PROPOSAL OF APPLICATION NOTICE – MAJOR PLANNING APPLICATION

Waste Tyre Processing & Recycling Plant - Burnbrae Road / Lyon Road, Linwood Industrial Estate, Renfrewshire

As the Director of Operations of SSH Recycling Ltd, I am pleased to enclose a Proposal of Application Notice (PoAN) and associated PoAN Report and Site Location Plan. The proposals are for the construction of a Waste Tyre Processing & Recycling Plant at Burnbrae Road / Lyon Road, Linwood Industrial Estate, Renfrewshire.

The submission of the PoAN commences a 12-week formal consultation process. Given the current COVID 19 restrictions the proposed consultation approach reflects Government Guidance which came into force on 24th April 2020 and removed the requirement for face-to-face public engagement during this emergency period and, as an alternative, promoted the use of online engagement to enable local people to have an opportunity to influence proposals through Pre-Application Consultation.

The proposed consultation and engagement approach set out in the enclosed PoAN Report fully reflects the Regulations and Guidance and provides engagement opportunities through a dedicated telephone hotline, a Virtual Town Hall event and the provision of project information via the project website www.sshrecyclingltd.com where stakeholders and members of the public can also submit comments and questions relating to the proposed development.

You are being formally notified of this submission as of today's date. We would welcome your comments and feedback on the proposals and hope that you will join us at our live Virtual Town Hall event on 20 March 2021.

Best wishes,

Robert Keay

Director of Operations
SSH Recycling Ltd
